

MARK KLETT and BYRON WOLFE

American, b. 1952 - American b. 1967

Four views from four times and one shoreline, Lake Tenaya

2002

Mark Klett and Byron Wolfe collaborated on many rephotographic survey projects. Featured in this panorama, (Eadweard Muybridge, Ansel Adams, Edward Weston). This panorama portrays Lake Tenaya and its physical changes over time. The lake continuously experiences these physical changes due to natural occurrences, or even human destruction. The entirety of these changes occur because of the prevalence of time and its effect on the environment.
